

KAVIPRAKASH S

Full Stack Developer — MERN Stack & Java

+91 9843174328 | kaviprakash2383@gmail.com | Bangalore, Karnataka
LinkedIn | GitHub | Portfolio

Professional Summary

Full Stack Developer specializing in MERN Stack and Java with experience building production-ready fintech, expense management, and geolocation applications. Skilled in designing secure RESTful APIs, JWT-based authentication, Role-Based Access Control (RBAC), scalable backend architecture, and cloud deployment. Passionate about developing secure, high-performance, and user-centric web applications using modern development practices.

Technical Skills

Languages: JavaScript (ES6+), Java, SQL, HTML5, CSS3

Frontend: React.js, Redux Toolkit, React Router, Tailwind CSS, Axios

Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, Socket.io, Hibernate, Joi Validation

Databases: MongoDB, MongoDB Atlas, MySQL, Mongoose

Cloud & Tools: Git, GitHub, Postman, Render, Vercel, Linux, Cloudinary, Razorpay, Google Gemini AI

Concepts: MVC Architecture, Data Structures Algorithms, OOP, DBMS, Scalable Architecture, Responsive Web Design, Agile Development

Professional Experience

Full Stack Developer Intern

2025 – 2026

DCT Academy

Bengaluru, India

- Engineered and deployed 3+ production-ready MERN applications with scalable backend architecture, secure RESTful APIs, JWT authentication, and middleware-based authorization.
- Designed and implemented 15+ RESTful APIs with Role-Based Access Control (RBAC), MongoDB Atlas integration, and secure authentication workflows.
- Collaborated in Agile development sprints using Git/GitHub while deploying full-stack applications on Render and gaining hands-on experience with Spring Boot, Hibernate ORM, and MySQL.

Projects

Metal Trading & Investment System (Luna Gold) | MERN · JWT · RBAC · Live Price APIs · MongoDB Atlas

- Designed and developed a fintech platform supporting User, Staff, and Admin dashboards with JWT-secured RBAC, digital wallets, SIP investments, KYC verification, and transaction management through 20+ secure REST APIs.
- Integrated live gold and silver pricing APIs with automatic INR conversion while designing scalable MongoDB schemas for secure financial data management and investment tracking.

Smart Spend – Personal Finance Management Platform | MERN · Redux Toolkit · Mongoose · Tailwind CSS

- Built a responsive personal finance platform featuring secure CRUD operations, Express.js backend services, MongoDB database integration, and robust input validation.
- Implemented Redux Toolkit for centralized state management and developed interactive dashboards for real-time income, expense, and category-wise financial analytics.

Artist Geolocation Tracker | React.js · Node.js · Leaflet Maps · Geolocation API

- Developed a real-time geolocation tracking platform using React.js, Node.js, Leaflet Maps, and the Geolocation API to visualize live user locations.
- Optimized React rendering and state management to ensure smooth real-time location updates without impacting application performance.
- Integrated backend APIs with MongoDB to securely store and retrieve historical location data for continuous tracking.

Education

National College (Autonomous)

Tiruchirappalli, India

Bachelor of Science in Computer Science

2022 – 2025

- CGPA: 7.90 / 10

Certifications

- MERN Stack Development Professional Training – DCT Academy
- Full Stack Web Development Masterclass – Udemy
- Artificial Intelligence Technical Internship – Pantech Prolabs India Pvt Ltd
